Cope

An international journal of fact and interpretation

VOLUME 12

October, 1999 — October, 2003

Dedicated to the primacy of content over display

EVOLUTIONARY THEORY

Volume 12

No. 1 (October, 1999), pp. 1-37; No. 2 (December, 1999), pp. 39-48; No. 3 (December, 2000), pp. 49-89;
No. 4 (November, 2001), pp. 91-100; No. 5 (December, 2002), pp. 101-130;
No. 6 (October, 2003), pp. 131-157.

What's in a niche? I. The usefulness of prey-size spectra	S. PEARRE	1
What's in a niche? II. Responses of trophic-niche indices to simulated and actual prey distributions and sampling regimes	S. PEARRE	23
Testicondy and ecological opportunism predict the rapid evolution of elephants L. WERDELIN, A. NILSSON, & M. FORTELIUS		39
Only one seeking sex: the best strategy for sexual meeting	F.G. COSTA	47
A review of group filiation of stramenopiles, additional approaches to the question W.H. BLACKWELL & M.J. POWELL		49
Form: a terminological suggestion for the study of human variation [Abstract]	G. STRKALJ	89
The role of pigments and structural colors in the evolutionary origin of feathers	N.K. JOHNSON	91
The last third of Mendel's paper [Idea Corner]	L. VAN VALEN	99
How did rodents and lagomorphs (Mammalia) originate?	L. VAN VALEN	101
Prokaryote phylogenies, lateral transfer, and ontic-epistemic confusion [Idea Corner]	L. VAN VALEN	129
Ovarian excess and the evolution of menopause	L. VAN VALEN	131
Fitness — scalar or vector? [Idea Corner]	L. VAN VALEN	155
