

Centre for Digital Life Norway

Opening seminar

April 19th, Trondheim

Hotel Scandic Lerkendal, Klæbuveien 127, Trondheim

Centre for Digital Life Norway (DLN) is a national center for biotechnology research and innovation. Through a transdisciplinary approach, the center's researchers combine experimental and computational methods, creating novel insight and solutions.

DLN is a response to the strategic initiative "Digital Life – convergence for innovation" funded by the Norwegian Research Council. DLN is a virtual center, currently involving six major research projects, and managed by a joint leadership network from NTNU, UiB and UiO.

Program

- 10:00 Official Opening
- 11:05 Presentation of current projects – Centre for Digital Life Norway (DLN)
- 13:45 Responsible research and innovation – A hallmark of the DLN activity
- 14:05 Industry, innovation and research – Challenges and solutions
- 14:30 Future possibilities within DLN – Upcoming call, panel debate
- 15:15 Towards Digital Biology – Inaugurating Volterra Lecture given by Dr. Eugene Myers, Director & Tschira Chair of Systems Biology, Max Planck Institute for Molecular Cell Biology and Genetics
