

...and ...but ...therefore

Edina Pózer

Broad introduction to the subject

AND

Sharpen the content: points to leading research or gives more detailed description (existing data)

BUT

Point to an unsolved problem; need for knowledge; need to be investigated

THEREFORE

How did the researcher approach the problem; what is the solution; how would this project resolve the question

Previous geophysical studies indicate that sediments reached Svalbard from western and eastern source areas

AND

there is also a suggested northern source area

BUT

there are no land masses in this region today

THEREFORE

it is important to analyze the sediments to decipher these source areas.

Bacteria are everywhere

AND

they are necessary for life

BUT

some few bacteria can harm us

THEREFORE

we need to learn more about harmful bacteria and their toxins.

Broad introduction to the subject

AND

Sharpen the content: points to leading research or gives more detailed description (existing data)

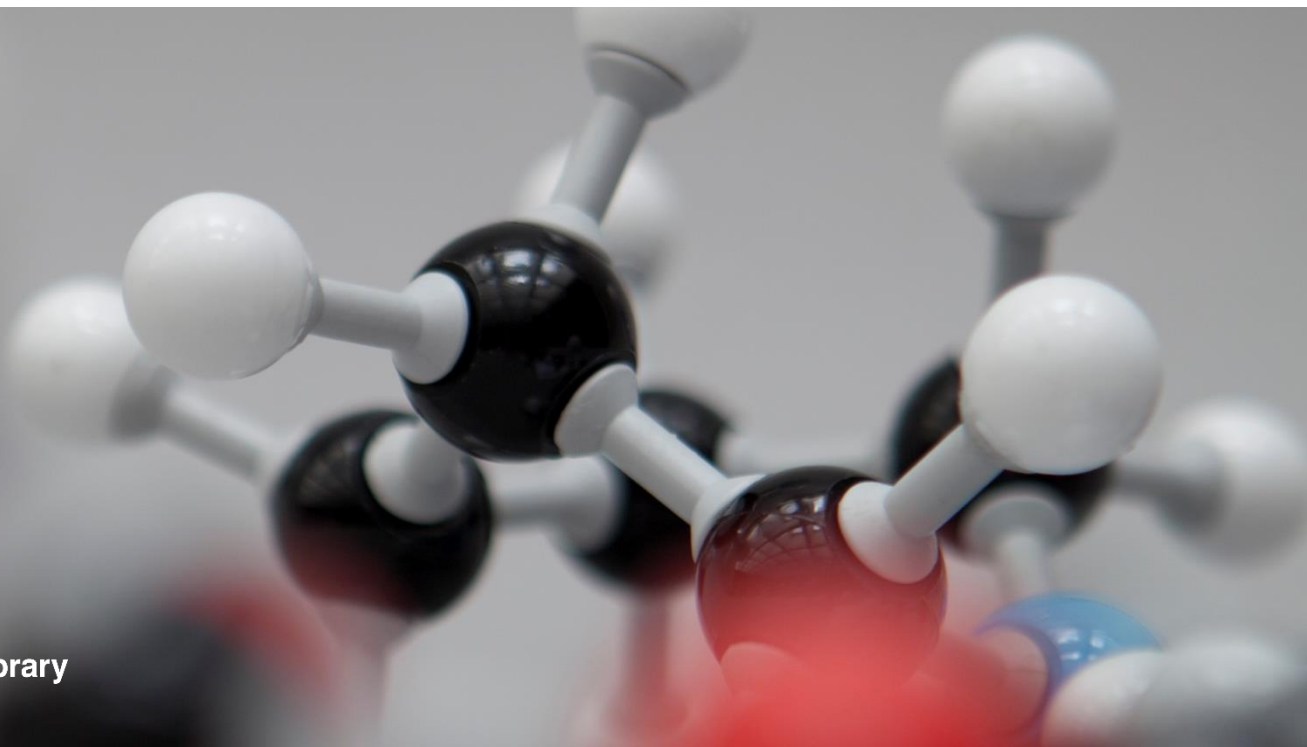

BUT

Point to an unsolved problem; need for knowledge; need to be investigated

THEREFORE

How did the researcher approach the problem; what is the solution; how would this project resolve the question

IGP

UiO : University of Oslo Library
Science Library

Work using the IGP-method

- Think for yourself first **I**ndividually
- Share your thoughts with your **G**roup (everybody has to take their turn!)
- Present your group's project in **P**lenum (pitch your project)
