PhD-course 5 ECTS in Oslo

When and where? October 16-20, 2017 @University of Oslo, Oslo, Norway

What do you get? State-of-the-art knowledge in bioanalytical chemistry, 5 ECTS, new friends/colleagues, and a nice week in Oslo!

What do you learn? You learn about state-of-the-art technologies and forefront applications in bioanalytical chemistry, with focus on chromatography, mass spectrometry, and sample preparation of biological fluids. You get practice in scientific presentation, and after one week in Oslo, you are definitely updated!

Who is teaching? Associate Professor Astrid Gjelstad, Associate Professor Trine Grønhaug Halvorsen, Associate Professor Steven Ray Wilson, Professor Leon Reubsaet, Professor Elsa Lundanes, and Professor Stig Pedersen-Bjergaard (responsible) from School of Pharmacy and Department of Chemistry, University of Oslo.

Why follow the course in Oslo? The teachers have for a long time balanced research and teaching at the highest level, and we are very experienced. We are internationally recognized in the field of bioanalysis through research on liquid-phase microextraction technologies, LC column technologies, and mass spectrometry-based targeted proteomics. Also, we are authors of international textbooks in bioanalysis, pharmaceutical analysis, and chromatography.

Who can participate? The course is particularly relevant for PhD-students working with chromatography and mass spectrometry in the fields of pharmaceutical analysis, biomedical analysis, clinical chemistry, proteomics, and metabolomics. The course is given in English as it is intended for international participation.

What is expected from you? Prepare a 5 min oral presentation with your research and a 30 min oral presentation of a selected research paper prior to the one-week course, and give the two presentations and participate actively during the one-week course.

More information and registration? Visit our web-page [http://www.mn.uio.no/farmasi/english/research/national-phd-school/events/](http://www.mn.uio.no/farmasi/english/research/national-phd-school/events/) or contact Professor Stig Pedersen-Bjergaard ([stigpe@farmasi.uio.no](mailto:stigpe@farmasi.uio.no)). Please sign up before September 1st, 2017.
