

ELSE-RAGNHILD NEUMANN AWARD

FOR WOMEN IN GEOSCIENCES

The Else-Ragnhild Neumann Award for Women in Geosciences

The Centre for Earth Evolution and Dynamics at the Department of Geosciences, University of Oslo, is announcing the establishment of a special award for Women in Geosciences in Norway.

The **Else-Ragnhild Neumann Award** will be conferred to a woman that has impacted the field of Geosciences in a major way based on her Ph.D. and Postdoctoral research. The award consists of a diploma and an honorarium of 50.000 NOK.

The nominee should reside in Norway at the time of nomination. Women are eligible for the first 7 years following their degree, except in the case of significant interruptions to a research career.

The Else-Ragnhild Neumann award honours the scientific contribution of Professor Else-Ragnhild Neumann. In 1981, she became the first female professor in Geosciences in Norway. She worked with the University of Oslo and published about volcanism and links to mantle processes. She studied the Oslo region, the Canary Islands and other volcanic islands, the Siberian Traps and other areas that experienced significant magmatism.

The first award winner will be recognised at the special symposium for Else-Ragnhild Neumann 80st anniversary on 07.12.2018.

----- NOMINATION PROCESS -----

Closing Date - Nominations (and all documentation) are due by 15 October 2018.

Nominations of candidates should be sent to CEED (email) to Trine-Lise Gørbitz: t.l.k.gorbitz@geo.uio.no

Nominations requirements – A nomination consist of:

Citation (1-2 pages), *Full Curriculum Vitae* (3-4 pages), and a *List of Publications*

1. *Citation (1-2 pages)*

Please provide a good understanding of the benefits of the candidate's contributions to science, together with any broader implications their contribution may have resulted in.

The detailed citation should:

- Describe the candidate's key discoveries and/or achievements in a clear, concise and sufficiently technical way to allow committee members to make a confident assessment of the candidate's work; and
- Describe the nature, impact, and importance of the candidate's discoveries and achievements in relation to their scientific discipline.

Please include a non-technical description of the candidate's work (c. 150 words) to be directed to a non-scientific audience and cover the significance of the candidate's research and its broader implications. This description will be used for publicity purposes, if the candidate is successful.

2. *Full Curriculum Vitae (3-4 pages)*

Include any evidence of international standing, major awards, fellowships and invited, keynote or plenary talks, where appropriate to the award.

3. *List of 5 Publications*

A list of up to 5 most significant publications (of most relevance to the award), each including up to 30-words on why they are significant. Outline the candidate's specific role in the research and indicate percentage contribution.

CEED and the Department of Geosciences at the University of Oslo will be responsible to appoint an evaluation committee, and the first winner will be announced in November 2018.

The award will be presented on 7th of December 2018 at the Norwegian Academy of Science and Letters.
