

LATICE – 2023 Annual Meeting

List of posters

1. Summertime energy and matter fluxes at Ås, South-East Norway, and investigation of land-atmosphere-interactions in an subarctic agricultural ecosystem
Laura Ehrnsperger (MET Norway): laurae@met.no
2. Evapotranspiration and soil moisture measurements during the two H2O-summercampaigns 2021 and 2022
Henning Haaland, Martin Økland (NMBU): henning.haaland1@gmail.com, maok@nmbu.no
3. Complementary field and modelling experiments: climate warming and alpine vegetation
Eva Lieungh (NHM, UiO): eva.lieungh@nhm.uio.no
4. The relevance of coupled climate model WRF-CTSM for land-atmosphere interactions analysis
Iris Mužić (CICERO, UiO): iris.muzic@cicero.oslo.no
5. Satellite altimetry as a new data source for snow depth data assimilation
Marco Mazzolini (UiO): marcomaz@uio.no
6. Snow depth retrieval using satellite altimetry, climate reanalysis data and machine learning: a case study in mainland Norway
Zhihao Liu (UiO): zhihaol@uio.no
7. Carbon dynamics of a controlled peatland restoration experiment in Norway
Michael Bekken (UiO): mabekken@uio.no
8. Hydrologic model calibration against discharge and evapotranspiration at the Hisåsen drained mire
Emiliano Gelati (UiO): emiliano.gelati@geo.uio.no
