

Cryo-Ex/IPY Cryospheric Science Meeting in Ottawa, Canada

Herman Farbrot, October 22, 2009

Several Cryolink participants from the University of Oslo (UiO) took part in the Cryo-Ex/IPY Cryospheric Science Meeting at University of Ottawa, October 16-19, 2009. [Cryo-Ex](#) is a Cryosphere Exchange program between UiO and UNIS, and the University of Ottawa (uOttawa) and Carleton University. During the meeting Tobias Hipp presented the Cryolink project, whereas Bernd Etzelmüller presented permafrost monitoring and modelling strategies in Scandinavia. Further, Herman Farbrot presented results from the IPY project [TSP NORWAY: Thermal State of Permafrost in Norway and Svalbard](#), and Karianne Lilleøren provided insight in rock glacier distribution in Norway. Ole Humlum informed about goals to strengthen Canada-Norway research links in the terrestrial cryosphere.

October 16, 2009, the participants of the meeting were invited to a [reception at the new Norwegian Ambassador's residence](#).

Reception at the Norwegian Ambassador's residence. From left to right: Hanne Christiansen (UNIS), Samantha Darling (uOttawa), Megan James (uOttawa), Geir Moholdt (UiO), Bernd Etzelmüller (UiO), Andreas Käab (UiO), Antoni Lewkowicz (uOttawa), Ole Humlum (UiO).

From left to right: The Ambassador Her Excellency Else Berit Eikeland, Joanne Lalonde, Antoni Lewkowicz (Cryo-Ex scientific coordinator, uOttawa), Bernd Etzelmüller (Cryo-Ex project leader, UiO).
