

Seminar

Trout in Hot Water?

Understanding Climate Change Impacts on Aquatic Ecosystems in Western North America

Wednesday 13. June at 13.15

Seminar Room 3508, Biology Building

Clint Muhlfeld

Research Aquatic Ecologist

*U.S. Geological Survey, Northern Rocky Mountain
Science Center*

Associate Professor

University of Montana, Flathead Lake Biological Station

Dr. Muhlfeld's presentation will describe how aquatic species and ecosystems are responding to multiple stressors - invasive species, habitat modification, and climate change - in western North America, and what managers are doing to conserve species and their habitats in a changing world.
