

Life after graduation

Your thesis in the big world

Menti

Who will read your thesis?

Your thesis in the big world

- Some master's students publish results in a journal
 - Requires major rewrite
 - Publishing is a science in itself
 - Be aware of self plagiarism and pre publication
 - Ask your supervisor for help!
- Share your thesis on arXiv.org
 - Gets publicity
 - Could be picked up by researchers around the world
- Share programs and code on GitHub or Zenodo
- Deposit and make it openly available in DUO

DUO - UiO's digital repository

- Mandatory to deposit your thesis in DUO
- Repository for all research from UiO
- Self archiving with open access option
- Indexed by Google, Google Scholar and others
- 30 000 Master's theses in DUO
- Beneficial to make it openly available
(Access must be restricted if thesis contains information that is subject to a duty of secrecy)

5 reasons to select open access in DUO

1. Future employers can access it
2. For future references
3. Part of a bigger research project
4. The research group needs access to your thesis in the future
5. Give everyone access to your work

Reasons to restrict access

1. Sensitive data
2. Business and competition
3. Future employers can access it

[Writing and publishing](#)[Master theses](#)[■ Submission](#)[■ Templates](#)[■ Why full text in DUO](#)[■ Restricting access](#)[■ Copyright](#)

Submission of Master's thesis to DUO

[Norwegian](#)

The thesis is submitted through Studentweb, and will automatically be moved to [DUO](#) (the digital archive of UiO) after approval.

Submit Master's thesis

[Submit in Studentweb](#) →[Detailed instructions for submitting](#)

Log in with your username and password.

Full text and access control

After being submitted in Studentweb, all Master's theses will be made available in full text in DUO.

- [Why full text in DUO?](#)
- [Restricting access](#)
- You must sign an [agreement giving the University the right to make your text available on the internet](#)
- [What happens to my thesis after submission in Studentweb?](#)

Change after the submission deadline

Information about how to [change accessibility](#), [correct spelling mistakes in title, summary or in your thesis](#).

The dark side of open publication

- You will get emails from journals offering:
 - Publication of your thesis
 - Publication of articles from your thesis
 - Inviting you to conferences
 - Inviting you to be a reviewer/editorial member
- Predatory!
- Junk E-mail!

Dear Great Researcher

We're so impressed with your research and want your \$

International Journal of Theoretical and Applied Mathematics

(ISSN Print:2575-5072 ISSN Online: 2575-5080)

Open Access Policy Peer-Reviewed Policy Publish Papers within 90 Days

Dear Moe, TK

Warmest greetings!

The paper published in *MATHEMATISCHE NACHRICHTEN* with the title *On the number of cusps on cuspidal curves on Hirzebruch surfaces* has impressed us deeply.

Scholars and researchers in the field of Cuspidal curves; Hirzebruch surfaces; number of cusps; logarithmic Kodaira dimension have expressed keen interests in your paper.

Invitation to Submit Your Manuscripts

Aiming at publishing academic articles, *International Journal of Theoretical and Applied Mathematics* can make specialists in various fields closer to the latest scientific researches. In light of the novelty, advance, and possible extensive use of your research results, **we sincerely invite you to submit other unpublished manuscripts of similar themes to the journal. Your latest research of this published article is also welcomed.**

If you have any interest, please refer to the following link for more information:

<http://www.ijtam.org/submission>

To Be the Editorial Member or Reviewer

On behalf of the Editorial Board of the journal, it's really a great honor to invite you to join our team as the editorial board member or reviewer of *International Journal of Theoretical and Applied Mathematics*.

Considering your academic background and rich experience in this field, the Board believe that you may be the most suitable candidate for this position. We hope that your position as the editorial board member/reviewer will advance the development of scientific researches in this field.

You can click the following link to know more information:

<http://www.ijtam.org/joinus>

Here attached the abstract of your research which has drawn the interest of most scholars:

Title: On the number of cusps on cuspidal curves on Hirzebruch surfaces

Abstract: In this article we give an upper bound for the number of cusps on a cuspidal curve on a Hirzebruch surface. We adapt the results that have been found for a similar question asked for cuspidal curves on the projective plane, and restate the results in this new setting. (C) 2014 WILEY-VCH Verlag GmbH & Co. KGaA, Weinheim

We really hope you can join us. Please kindly let us know your idea.

Warm regards,

Jessie Wright

Introduction

Dr. Tian Baodan is currently working as a professor in Southwest University of Science and Technology. He has published more than forty articles in Chinese and international journals, presided or participated more than ten research projects. He is a reviewer for 《Mathematical Reviews》 of American Mathematical Society and a member of Chinese Society for Mathematical Biology, and served as peer reviewer of many international journals.

DEF CON 2018 | By [Daniel Oberhaus](#) | Aug 14 2018, 12:00pm

Hundreds of Researchers From Harvard, Yale and Stanford Were Published in Fake Academic Journals

How the World Academy of Science, Engineering and Technology became a multimillion dollar organization promoting bullshit science through fake conferences and journals.

Predatory journals

- Incoming e-mail
- Little or bad peer review
- Editorial board questionable
- Fake ISSN
- Fake impact factor
- Persistent advertising
- Mimicking names of established journals
- Surprise fee
- Submission fee
- Questionable copyright handling
- New or unknown publisher with a large number of titles

Meanwhile, in the research community...

- Researchers and students find your thesis
- Your thesis is read by researchers and their students
- Master's theses are often easy to read
- Citations!!
- Your results are challenged and improved
- Results bear your name!
 - Bratteli diagram by Ola Bratteli
